## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Futamura et al. (6,003,359). Futamura discloses a metal sheet pressing method wherein a sheet metal part (19) is partially drawn (fig. 3b), heated by heating means (11) and pressed into a final shape thereafter. In figure 5(b) Futamura discloses that the sheet has a perforated through hole.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Futamura et al. (6,003,359) in view of de Smet (5,119,658). Futamura does not disclose multiple perforations to form a mesh in the metal sheet. De Smet teaches that it is known to form multiple perforations (2) in a sheet prior to pressing the sheet to a final shape. It would have been obvious to one skilled in the art at the time of invention to provide the

metal sheet of Futamura with the multiple perforations as taught by de Smet in order to give the finished product a meshed or porous appearance.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
